## MACHINE OVERVIEW

New **RE Doppia** is an automatic traditional machine that combines the latest Rocket Espresso technology with a specification and level of componentry that represents a machine brought to market with an aggressive approach to price versus specification. This does not mean the Doppia is any less of a machine, rather with clever engineering, the Doppia clearly outperforms most machines in this class.

# RE DOPPIA

## DESIGN

**Unique design** for new RE Doppia from Rocket: a machine that stand for its elegance and robustness.

The chassis of the machine is made in **Stainless steel**

**AISI 304**: no doubt that is a Rocket machine!

# RE DOPPIA DESIGN

In addition to the Stainless steel version, upon request, RE Doppia machine is available also in:

**BLACK VERSION:**

Stainless steel chassis with **matt black** side and panels;

**WHITE VERSION:**

Stainless steel chassis with **matt white** side and panels;

# MAIN FEATURES

# RE DOPPIA

## DUAL BOILER TECHNOLOGY

RE Doppia has two boiler in Stainless steel AISI 316L.

**One boiler dedicated to the coffee** and one big boiler for steam and hot water.

Capacity of the coffee boiler is:

- ✓ 2 groups machine: **4l**
- ✓ 3 groups machine: **6,3l**

Fully saturated coffee group with a dedicated coffee boiler for temperature stability.

# RE DOPPIA

## DUAL BOILER TECHNOLOGY

Service boiler for steam and hot water:

- ✓ 2 groups machine: **9l**
- ✓ 3 groups machine: **12l**

High capacity for high performance in steam and hot water.

# RE DOPPIA INTERFACE

RE Doppia fits a new interface.

Buttons pad for each group with 4 buttons for the following operations:

- **Start/Stop** button
- **Single shot**
- **Double shot**
- **Flush**

Available a version with **6 buttons**

# RE DOPPIA INTERFACE

For each group is available a small display.  
The display shows, when the machine is not  
working, the **temperature** of the coffee group;  
during the brewing process it turns into **shot timer**

# RE DOPPIA INTERFACE

4,3" TFT service display on the front panel of the machine. Information available on the display:

- Pressure of the service boiler
- Water pressure from the main line
- Access to the machine setting

# RE DOPPIA

## TALL CUP VERSION

RE Doppia can be configured in standard version or **Tall Cup**: one article number for two version thanks to the adjustable drip tray.

The height of the drip tray can be adjusted from **85 mm** for the standard version up to **125 mm** for Tall Cup.

# RE DOPPIA

## STEAM WAND

RE Doppia features **two steam wands, barista style.**

Long steam wand to make easy the task of the barista,  
**cold touch.**

With a special system by Rocket, **steam is dry** and with  
a minimal initial condensation (**Patent Pending**).

Thanks to the big capacity of the service boiler in Re  
Doppia, continuous use of steam is guaranteed with **no  
drop in performance** even when using two wands at  
the same time.

With the lever the control of the speed of the steam is  
always guaranteed.

**PATENT  
PENDING**

# RE DOPPIA

## HOT WATER SPOUT

Available one hot water wand, with **two selection buttons** for setting two different doses of hot water. Possibility to adjust the temperature of the water mixing hot water from the boiler and cold water from main line.
